

# Nepal Needs Help

to fight against Covid-19

## Mission for Tribes is 'on the ground' in Nepal

### Working to save many lives

Today, millions of people in Nepal are suffering in a second wave of Covid-19. Thousands are dying needlessly every day.

Hospitals lack ICU facilities and oxygen, and due to this the number of deaths is escalating. MFTN is working in the hospitals and high-risk areas to help Covid victims by providing food relief aid and basic medical resources.

## Current needs...

### Oxygen Machines

Hospitals lack oxygen machines. Sufferers who receive oxygen have increased recovery rates. We have purchased four machines but we need more. Our Goal is to buy at least 15. We are able to purchase them from China.

A Chinese "Yuwell Homecare" Oxygen Machine costs £480 (Including shipping from China to Nepal). Please would you consider partnering with us to meet this goal? Every single £ makes a difference.

100% of money donated to MFTN at this time will be spent on these projects

### Rice Packs

Most people in rural areas of Nepal are paid a daily wage. Because of lockdown they are unable to provide for their families and are starving.

A Food Pack contains a 25 kg sack of rice, 1 litre of cooking oil, 1 kg salt and 2 kg of lentils. It costs £12 and will feed one family for a whole month. We aim to help at least 500 families. Please will you sponsor a family for a month?

People in Nepal need your help. Thank you for your prayers and donations
